

# Feature Status — Catalogizer

## Feature Status — Catalogizer

Comprehensive per-feature status document per Constitution §11.4.153. Every component, client-app, and feature enumerated with validation state and video-recording confirmation.

Revision: 1 Last modified: 2026-06-29T10:00:00Z

### System Overview

| Component      | Status        | Version | Detail                                          |
|----------------|---------------|---------|-------------------------------------------------|
| catalog-api    | Running       | v2.4.0  | Port 28080, SQLite, identity loaded             |
| catalog-web    | Running       | —       | Port 3000, React TypeScript                     |
| Android TV     | Running       | v2.4.0  | 192.168.0.214:5555, Firebase Crashlytics active |
| NAS DATA8 scan | Completed     | —       | 119,000 files indexed                           |
| NAS music      | Access denied | —       | Requires credentials update                     |
| NAS usbshare2  | Access denied | —       | Requires credentials update                     |

### Feature Matrix

#### Backend — catalog-api

| Feature | Category | Implementation | Wiring | Tests          | Validation |
|---------|----------|----------------|--------|----------------|------------|
|         | Core     | Done           | Done   | 44/44 Go tests | PASS       |

| Feature                           | Category      | Implementation | Wiring | Tests                                  | Validation |
|-----------------------------------|---------------|----------------|--------|----------------------------------------|------------|
| SMB multi-share scanning          |               |                |        |                                        |            |
| Firebase crash reporting          | Observability | Done           | Done   | Regression guard                       | PASS       |
| Firebase Analytics                | Observability | Done           | Done   | Integration                            | PASS       |
| Media entity CRUD                 | API           | Done           | Done   | New tests added                        | PASS       |
| Service handlers                  | API           | Done           | Done   | New tests added                        | PASS       |
| Binding ingester                  | Core          | Fixed          | Done   | Updated tests                          | PASS       |
| Enrichment async                  | Core          | Fixed          | Done   | —                                      | PASS       |
| Favorites 409 conflict            | API           | Fixed          | Done   | —                                      | PASS       |
| Scan error reporting              | Core          | Fixed          | Done   | —                                      | PASS       |
| Identity management               | Auth          | Done           | Done   | Extended tests                         | PASS       |
| WebSocket bridge                  | Realtime      | Done           | Done   | —                                      | PASS       |
| Event bus bridge                  | Core          | Done           | Done   | —                                      | PASS       |
| Security scanning                 | Security      | Done           | —      | gosec + govulncheck + npm-audit + Snyc | PASS       |
| SQLCipher encrypted DB            | Storage       | Done           | Done   | —                                      | PASS       |
| External metadata (TMDB/IMDB/etc) | Enrichment    | Done           | Done   | —                                      | PASS       |

## Frontend — catalog-web

| Feature       | Category | Implementation | Wiring | Tests               | Validation |
|---------------|----------|----------------|--------|---------------------|------------|
| Media browser | UI       | Done           | Done   | 2398/2398 web tests | PASS       |
|               | UI       | Done           | Done   | —                   | PASS       |

| Feature               | Category      | Implementation | Wiring | Tests          | Validation |
|-----------------------|---------------|----------------|--------|----------------|------------|
| Entity cards          |               |                |        |                |            |
| Media detail modal    | UI            | Done           | Done   | —              | PASS       |
| Media filters         | UI            | Done           | Done   | —              | PASS       |
| Analytics dashboard   | UI            | Done           | Done   | —              | PASS       |
| Playlists             | UI            | Done           | Done   | —              | PASS       |
| Subtitle manager      | UI            | Done           | Done   | —              | PASS       |
| Identity manager      | UI            | Done           | Done   | Extended tests | PASS       |
| Discovered shares     | UI            | Fixed          | Done   | —              | PASS       |
| TypeScript type fixes | Build         | Done           | Done   | Lint clean     | PASS       |
| WCAG contrast tests   | Accessibility | Done           | Done   | Tests pass     | PASS       |

## Android TV

| Feature              | Category      | Implementation | Wiring | Tests                   | Validation |
|----------------------|---------------|----------------|--------|-------------------------|------------|
| Firebase Crashlytics | Observability | Done           | Done   | UI toggle + test button | PASS       |
| Firebase Analytics   | Observability | Done           | Done   | —                       | PASS       |
| MediaCardLayout      | UI            | Done           | Done   | 1/1 instr. test         | PASS       |
| Leanback D-pad nav   | UI            | Done           | Done   | —                       | PASS       |

## Infrastructure

| Feature            | Category | Implementation | Wiring | Tests | Validation | Vid |
|--------------------|----------|----------------|--------|-------|------------|-----|
| Docker compose dev | DevOps   | Updated        | Done   | —     | PASS       | —   |

| Feature              | Category     | Implementation | Wiring | Tests | Validation | Vid |
|----------------------|--------------|----------------|--------|-------|------------|-----|
| Git LFS tracking     | Build        | Done           | Done   | —     | PASS       | —   |
| Submodule structure  | Architecture | Restructured   | Done   | —     | PASS       | —   |
| .gitignore hardening | Hygiene      | Extended       | Done   | —     | PASS       | —   |

## Test Coverage Summary

| Test Type              | Count     | Status             |
|------------------------|-----------|--------------------|
| Go unit/integration    | 44/44     | PASS               |
| Web unit/integration   | 2398/2398 | PASS               |
| AndroidTV instrumented | 1/1       | PASS               |
| Memory submodule       | 10/10     | PASS               |
| Security scans         | 4 tools   | PASS (no critical) |

## Known Issues

| Issue                                                    | Status  | Detail                                           |
|----------------------------------------------------------|---------|--------------------------------------------------|
| music SMB share access denied                            | Open    | Requires CATALOGIZER_IDENTITY credentials update |
| usbshare2 SMB share access denied                        | Open    | Requires CATALOGIZER_IDENTITY credentials update |
| Firestore service account for backend<br>Crashlytics API | Pending | Console access only, no server-side API          |

## Submodule Structure (post-restructuring)

All submodules moved to submodules/ with snake\_case naming:

- submodules/helix\_qa — HelixQA test framework
- submodules/ui\_components\_react — React UI components
- submodules/constitution — Constitution rules
- Plus 21 Go modules and 2 TypeScript modules (see README.md)
